

Reduce costs, improve efficiency, & drive growth

Modernize your applications with CoEnterprise

Application modernization and moving to the cloud are top priorities for most CIOs, not only to cut costs and solidify growth, but also to remain competitive. CoEnterprise can guide you on your B2B/MFT modernization journey to ensure your infrastructure and applications are optimized and cloud ready while your organization is primed for future growth.

Why application modernization?

When you modernize, you update and adjust your technology strategy to align with your company's cloud strategy, get a jump on digital transformation, and achieve several business-boosting benefits, including:

- Cloud-ready B2B/MFT applications that drive revenue growth
- Lighter infrastructure footprint and reduced support needs
- Reduced system downtime and higher levels of service
- Simplified application deployment/maintenance
- Increased application resiliency and agility
- Reduced application development cost

Reduction in infrastructure costs

Faster time to market

Increase in IT administrator efficiency

Less IT time utilization per application

While these are measurable benefits, application modernization requires up front planning to help ensure a successful upgrade.

Here's why we're your trusted modernization experts...

Cloud & application expertise

System integrators typically boast either cloud or B2B/MFT application proficiency. We have broad experience across both. We'll help you determine which cloud providers will be a part of your strategy going forward and help create a plan to ensure optimal setup of your infrastructure and applications.

Strong partnerships

Our long-standing relationships with some of the largest and most successful cloud and container providers in the space, including Red Hat and IBM, makes us a trusted partner for your modernization project.

A proven methodology & approach

We guide you by utilizing a proven cloud migration methodology to replace slow, monolithic B2B/MFT applications with a highly available, agile hybrid cloud platform—and our holistic approach focuses on both applications and infrastructure to create the best possible outcomes.

PROUD PARTNERS WITH

CoEnterprise Managed File Transfer and EDI Managed Service

Let's face it—you want to spend your time running your business, not maintaining technology. Our fully managed service enables you to do just that. We'll handle the upgrades, patching, and versioning—you focus on what matters most. We also know how important your trading partners are. That's why we ensure consistent, repeatable processes, streamlined connections (refresh), and fast and easy partner/supplier migrations.

HERE'S HOW WE DO IT

- Cloud-based architecture
- Translation services
- B2B integration single tenant platform as a service (PaaS)
- Any to any protocol
- Operational services
- Program strategy and development

Explore the advantages

With a predictable cost structure that includes all aspects of the build, hosting, application maintenance, and licensing assistance, you'll rest assured that you're getting what you pay for without any of the headaches associated with an on-premise solution.

- ✓ **Scalability**
Centered around your requirements with automated and simplified processes
- ✓ **Visibility**
24/7/365 real-time visibility, proactive monitoring, and SLA compliance
- ✓ **Budget**
Increased speed to ROI, reduced infrastructure and security costs, and access to dedicated experts
- ✓ **Capabilities**
Highly available with the latest security standards, 24/7/365 support, compliance, & risk reduction
