

## TABLEAU SOLUTIONS AND SERVICES

# Transform your business into a data-driven organization.

Tableau transforms the way people use data to solve problems. As a premier services & reseller partner, we support Tableau users across the globe with superior product know-how, informative training, and optimized data environments that drive real business value.

### Why CoEnterprise?

All of our Tableau certified practice leaders are also business experts with decades of practical hands-on experience at industry-leading consulting firms. Our unique blend of analytics strength, business intuition, and problem-solving enable us to cut through the noise and focus on delivering Tableau solutions custom tailored to your business needs.

- Nearly 1,000 customers helped and counting...
- Thousands of custom visualizations implemented
- Tableau Services & Training Partner of the Year (multi-year recipient)

### Here's how we can help you...

#### End-to-End Analytics Strategy—Including Machine Learning and AI

Many solution providers can show you how to optimize your data, but often cannot help when it comes to delivering business value. Our delivery framework aligns with Tableau Blueprint's step-by-step guidelines and will help you develop a data-driven culture of self-sufficiency so you can maximize user adoption and ensure long-term success.

We can also help you leverage the innovations in AI and machine learning to improve data composability and drive a more agile and efficient integration of diverse data sources—allowing you to easily connect data insights to real business actions.

#### Salesforce Integration for Actionable Data Insights

Our Tableau experts go above and beyond simply embedding Tableau content into your Salesforce environment—we fully integrate the power of Salesforce directly within your Tableau dashboard. This allows you to view, interact, update, and act upon your data to answer business questions, predict time to close for key opportunities, and make better-informed decisions, all powered by Tableau CRM (formerly Einstein AI).

#### Guided Dashboarding, Report Migration, and Server Architecture

We can guide your teams through best practices and develop custom visualizations in dashboards to drive your success—or help you migrate from a legacy BI tool to Tableau. We can also deploy, monitor, and maintain your Tableau server environment and work with you to identify strengths, areas for improvement, and recommendations on changes moving forward.

## Tableau Online Migration

Our comprehensive three step process ensures your migration is fully aligned with your business goals and that your data is continuously monitored and optimized for long-term success. Our experienced team will work with you side-by-side to fully understand your migration goals and existing Tableau architecture, migrate your workloads, and manage and maintain your data so you can focus on running your business.

## Tableau Embedded Analytics

Our experts can help you get the most out of Tableau's embedded analytics platform so you can focus on running your business. Tableau's EA allows you to create a seamless experience with your customers and create new business opportunities through data monetization. It also integrates with existing technologies so you can maximize your resources and keep the focus on your products, not building a solution.

## User Training & Adoption Enablement to Drive Self-Sufficiency

Our onsite training is led by certified Tableau experts, educating your team on best practices taught by the industry's finest. From Tableau fundamentals to advanced topics, each session is customized and tailored to your data, preparing your team to maximize adoption and conquer any data challenge.

## Snowflake Integration

As a Snowflake Select Partner and experts in all things data and analytics, we know how important your critical information is to your business. Our trusted team can guide you with a custom Snowflake solution to empower you with the flexibility and scalability you need to integrate, analyze, and securely share your data to optimize performance and seamlessly collaborate with internal teams and partners.

Don't take our word for it,  
see the results for yourself...
