SNOWFLAKE EXPERTISE & GUIDANCE

The confidence to safely and securely share your sensitive data.

We understand how important your data is to your business. There is tremendous opportunity in monetizing it but that can come with risks. If you're unable to control access with confidence, you risk an excess of compliance and security-related headaches.

A foundational promise of Snowflake is that the effort to administer is simple and minimal — and yet the one area that runs the risk of runaway complexity is role-based access control (RBAC). Luckily, as a trusted Snowflake partner and passionate experts in all things data, we can help.

Why Prioritize Role-Based Access Control?

RBAC is a critical layer in Snowflake's Access Control Framework which allows privileges to be granted by Object Owners to Roles. Roles can then be associated with Users to restrict/allow actions to be performed on objects. However, when RBAC is not prioritized and managed through best practices, there are many issues that can arise until an environment becomes ungovernable.

For example, something as simple as best-practice naming conventions can be the difference between the creation of a new database environment in a few hours versus days.

snowflake

Other problems you may incur include:

☒ **Permissions that are difficult to audit/unwind**

☒ **Compliance challenges and regulations**

☒ **Difficulty provisioning and deprovisioning users**

☒ **Governance issues arising from too many users having control**

☒ **Challenges unwinding problematic roles/relationships**

☒ **Ad-hoc permissions that break governance policies**

The CoEnterprise Solution: We've Got URBAC

Our custom solution features a best practice configuration of Snowflake's RBAC architecture and an overview of existing access control implementation. We'll also work with you to identify current and often unknown security challenges, gaps in data governance, and offer roadmap recommendations. Our passionate team will also provide you with a detailed security checklist, monitoring and auditing queries, and Tableau performance monitoring dashboards.

Unmatched Expertise and Excellence

Our Snowflake certified experts have the experience, flexibility, and technical skills to support your unique business goals. And because we're a trusted Snowflake partner, you can rest assured that we'll be there to support your ongoing needs.
