

TABLEAU ANALYTICS FROM COENTREPRISE

See Your Data, Advance Your Business

Tableau products transform the way people use data to solve problems, and as 2017 Tableau Partner of the Year, CoEnterprise has empowered users across the country with superior product know-how, informative training and optimized implementations. No matter how complex the project or customer, CoEnterprise maximizes the value of Tableau and enables users to take back control over their data.

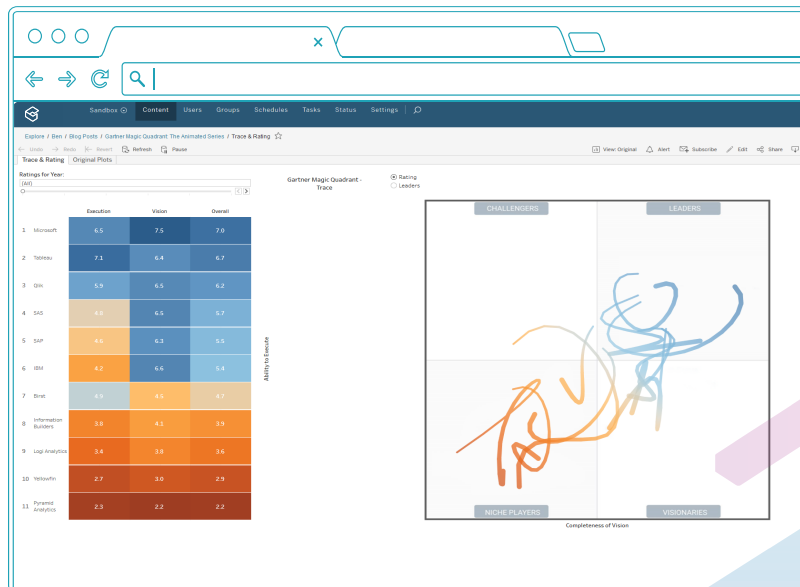

Deployment and Strategy Planning

Our policy is to ensure that our customers have a path toward success from the moment of their purchase, which is why we take deployment and implementation very seriously. By driving knowledge transfer, providing robust documentation and training sessions, and continually driving utilization throughout organizations, we have seen immediate performance and productivity improvements from our customers. Our process begins by working with your teams to gather requirements and plan for the future success of your business. We then assist in the design, building, and customization of the most effective and efficient solution for your company. From there we work to fine-tune performance, efficiency, and visual aesthetics to ensure long-term success.

Custom Visualizations

A user's Tableau environment is only as good as the strength of its visualizations and the amount of insights that the business can glean from their data. CoEnterprise's team of product experts will guide your teams through best practices and develop custom visualizations in dashboards to drive your success. All of our Tableau practice leaders are also business experts with decades of practical hands-on experience at industry-leading consulting firms. It is this unique blend of technical expertise and management consulting that helps us ensure that our visualization projects are delivered on-time, within budget, and with the utmost attention to our customers' needs.

Adoption and Support

It's our unique and customized approach to each customer that has solidified our reputation in the field, driving platform adoption to ensure you're getting the most out of your data. Our dedicated professionals help drive customer engagement retention rates of over 75% - more than double our competitors.

Our industry-leading Assurance plans are designed to provide security and support when you need it the most. With CoEnterprise Tableau Assurance, you gain access to a dedicated engineer who understands your environment, architecture, topology, industry, and business processes, enabling you for success from day one. Periodic review meetings and high level executive summaries ensure your organization is covered on all topics. Additionally, we serve as your advocate when dealing with Tableau, working on your behalf to bring greater efficiency and best practices to your business.

About CoEnterprise
