

On-Premise to Tableau Cloud Readiness Assessment

As a trusted Tableau Partner since 2014, CoEnterprise can help your organization understand the effort and benefits of migrating your self-managed Tableau Server environment to the fully hosted and managed Tableau Cloud platform.

Our experienced team will analyze your infrastructure and assess your business needs to help determine if you should move to Tableau Cloud. Our "Cloud Readiness Assessment" will help you avoid the common pitfalls of platform migration—hidden costs, frustrating delays, and lack of adoption. We do this by leaning on our experience as a Tier 1 Delivery Partner for Tableau with thousands of completed projects and hundreds of happy customers.

A Customized Strategy For Your Business

While technical migration components are foundational to any migration, we also believe that assessing the business needs and taking them into consideration is vital to the overall project success. That's why we think it's so important to have those business conversations and incorporate that output into your Tableau Cloud migration strategy.

- ✓ Learn **key steps** and **best practices** to assess and migrate your on-premises analytics to Tableau Cloud
- ✓ Get quick access to **expert guidance, tools, and resources** to help you plan your next steps
- ✓ Estimate your costs and see how CoEnterprise can help you
- ✓ See how a CoEnterprise migration plan may **lower your Tableau total cost of ownership (TCO)**

Assess

A COE engineer will understand your current Tableau environment and other considerations to meet your goals.

Plan

Plan for a migration to Tableau Cloud. Identify resource plan, effort required, and potential risks.

ROI

Take a data-driven approach to understand the financials of a cloud migration.

Jumpstart your journey to Tableau with CoEnterprise and receive expert guidance to expedite your migration.
