# Syncrofy Integration Cloud (SIC)

## Rethink EDI/B2B and elevate your supply chain with a groundbreaking managed service alternative

With investments in software as a service (SaaS) expected to surpass $200 billion this year, more and more businesses are outsourcing due to cost-effectiveness and scalability. Many SaaS providers are also using a multi-tenant approach that leads to more efficient use of resource sharing.

## What is a multi-tenant managed service?

A multi-tenant managed service refers to software architecture where multiple customers share a common infrastructure and resources but are logically separated. This approach is commonly seen in SaaS offerings and allows for data flows and configurations to be quickly repeated and users to only pay for what they need.

**According to a recent survey** of companies who engaged a service provider, it was found that:

**50%**
Saved 1-24% in annual IT costs

**33%**
Saved 25-49% in annual IT costs

**13%**
Saved over 50% in annual IT costs

## How Syncrofy Integration Cloud stands above the rest

SIC is an intuitive and powerful managed service alternative to your on-premise EDI/B2B operations or replacement for your current solution.

As a multi-tenant, cloud-based SaaS, SIC ingests files from your EDI platform and transforms them into a format your partners can easily consume in their ERP systems and vice versa. SIC establishes communications with you and your trading partners to transmit the files–then positions **Syncrofy**, a powerful supply chain visibility platform, in between to capture those transactions for visibility.

## The Benefits of Syncrofy Integration Cloud

With SIC, you'll experience a new era of streamlined and transparent supply chain operations–where data flows seamlessly and insights are at your fingertips:

- High scalability
- Reduced complexity
- Improved efficiencies in real-time
- Reduced infrastructure footprint
- Full transaction lifecycle visibility
- 24 x 7 system monitoring & support
- Worry-free hardware, updates, maintenance & security
- Best-in-class implementation methodology

# The Power of Syncrofy

SIC is powered by Syncrofy, our supply chain visibility and intelligence platform that consolidates scattered information and makes it accessible for all users in all departments, without having to leverage IT. Syncrofy offers a comprehensive suite of business visibility features to enhance operational efficiency.

## SYNCROFY'S FEATURES INCLUDE:

- Correlated EDI and supply chain documents in a human-readable format

- Business language failure notifications that remove the need for IT involvement

- Unlimited data retention— unlike ERP systems that remove after a fixed period of time

- Powerful real-time, configurable dashboards

- Proactive notifications and alerts on supply chain exceptions

- Full order lifecycle visibility including 4-way matching

- Supplier and customer scorecarding including fill rate, lead time, OTIF, and more

- Partner access for collaboration

## Tailoring connectivity to your business needs

Your business is unique. That's why we offer a variety of options when determining how you will send and receive transactions. SIC supports any-to-any translations so your organization's platforms can cross-talk with it and your partner community.

- ✓ EDI
- ✓ Tradacoms
- ✓ EDIFACT
- ✓ RND
- ✓ XML
- ✓ cXML
- ✓ Flat
- ✓ CSV
- ✓ **Human readable**
- ✓ **Proprietary** (SAP, Oracle, Great Plains, ERP platforms, etc.)

# The CoEnterprise Difference

We are committed to helping you get the most out of your investment. With deep expertise in B2B/ERP integration, application modernization, cloud enablement, and legacy platform migrations–we complete every project in less time, with fewer resources and better outcomes. And it's more than just our experience–we offer a proven, award-winning process that assures on-time, on-budget service delivery reliability with superior customer support. Your success story begins with CoEnterprise.
